

May 6, 2025

Dear valued provider,

We are writing to tell you that, **effective 8/11/2025**, Chorus Community Health Plans will begin applying Multiple Procedure Payment Reduction (MPPR) on certain diagnostic imaging services for the Commercial line of business.

When multiple procedures part of MPPR are reported by the same provider, for the same individual, on the same date of service, the procedure code with the highest total allowance is eligible for reimbursement at 100 percent of the provider's applicable contracted rate. Each subsequent procedure code is eligible for a reduction in the provider's applicable contracted rate.

Professional claims:

- Procedure codes designated with a Multiple Procedure Indicator of 4, diagnostic imaging services subject to the MPPR, can be downloaded from the Quarterly Medicare Physician Fee Schedule (MPFS) located [here](#).
- If billed for the professional component (26 modifier), the procedure code with the highest allowance is paid at 100 percent, and all secondary radiology procedures are reduced by 5 percent.
- If billed for the technical component (TC modifier), the procedure code with the highest allowance is paid at 100 percent, and all secondary radiology procedures are reduced by 50 percent.
- If billed **globally** (no modifier 26 or TC), the procedure code with the highest allowance is paid at 100 percent. All secondary radiology procedures have the technical portion of the rate reduced by 50 percent and the professional portion of the rate reduced by 5 percent.

Sincerely,
Chorus Community Health Plans
