Chorus Community Health Plans (CCHP) and Care4Kids recognizes that some of its members are prescribed antipsychotic medications. Though these medications can play an important role for patients, both first-generation (typical) and second-generation (atypical) antipsychotics can put patients at risk for side effects such as weight gain, dyslipidemia, and impaired glucose control which can contribute to the development of diabetes mellitus and cardiovascular disease. Monitoring for side effects is important in patients prescribed these medications, especially children and adolescents who are more susceptible to developing adverse effects.

If you prescribe one or more of the following medications...

<table>
<thead>
<tr>
<th>Antipsychotic Medications</th>
<th>Description</th>
<th>Prescription</th>
</tr>
</thead>
<tbody>
<tr>
<td>Miscellaneous antipsychotic agents</td>
<td>Aripiprazole, Asenapine, Brexpiprazole, Cariprazine, Olanzapine, Haloperidol</td>
<td>Perphenazine, Pimozide, Quetiapine, Lurasidone, Mirtazapine, Ziprasidone, Ziprasidone</td>
</tr>
<tr>
<td>Phenothiazines</td>
<td>Chlorpromazine, Fluphenazine, Perphenazine</td>
<td>Thioridazine, Trifluoperazine</td>
</tr>
<tr>
<td>Long-acting injectables</td>
<td>Aripiprazole, Fluphenazine decanoate, Haloperidol decanoate</td>
<td>Olanzapine, Paliperidone, Paliperidone palmitate, Paliperidone</td>
</tr>
</tbody>
</table>

If you prescribe one or more of the following medications...

Clinical guidelines recommend ordering the following metabolic laboratory tests.

- Blood Glucose Level OR Hemoglobin A1c
- LDL-C Level OR Cholesterol Level

*These labs may be either fasting OR non-fasting*

Clinical Guidelines recommend performing metabolic laboratory tests on the following schedule:

- At baseline (before starting initial medication therapy)
- Every 6 months thereafter
- 3 months after starting medication therapy

CCHP and Care4Kids are proud to partner with all our network providers and our members! If you have any questions about these clinical guideline recommendations, please contact CCHP’s Clinical Quality Improvement Department at 414-266-3268.

The Wisconsin Child Psychiatry Consultation Program (CPCP) can provide practitioners consultation and support in managing patients with mental and behavioral health conditions; visit www.chw/cpcp for more information.
