

Prescription Medication List 2025

Pharmacy program overview

The pharmacy program of Chorus Community Health Plans (CCHP) offers a variety of high-quality, effective generic and brand-name prescription drugs. This guide provides information that applies to most members. For information specific to your plan, please read your Schedule of Benefits.

When you need a prescription medication, CCHP offers medications on different levels or “tiers.” Each tier has a different member responsibility. This gives you and your doctor the freedom to choose the medication that is right for you. At the same time, this will help you to better budget your health care dollars.

This guide provides an overview of your pharmacy benefit with CCHP. It explains the tiering structure, the process for getting certain drugs covered, your options for filling prescriptions, important phone numbers and more.

Contact numbers

Current Chorus Community Health Plans members

- Customer Service: 1-844-201-4672
- Pharmacy Services (for practitioners and pharmacies): 1-844-201-4677
- Hearing-impaired members: TTY: 7-1-1

Prospective Chorus Community Health Plans members

- Sales Team: 1-844-708-3837
- Online information is available at **chorushealthplans.org/our-plans/prescription-coverage**.

For the latest information on the CCHP drug formulary and other pharmacy benefits, go to **chorushealthplans.org/our-plans/prescription-coverage**. You may also call Customer Service at the number listed above or on the back of your member ID card.

Read your contract carefully to determine which health care services are covered.

For prospective members

If you are thinking about joining Chorus Community Health Plans (CCHP) and would like information about applicable coinsurance or copayment amounts, go to the Summary of Benefits and Coverage (SBC) on the CCHP website at **chorushealthplans.org** or call the Sales Support team at 1-844-708-3837.

Understanding coverage and cost sharing

Our formulary is the list of Food and Drug Administration (FDA)-approved drugs that we cover. Our Pharmacy and Therapeutics (P&T) Committee researches and evaluates medications we may cover. Committee members include local doctors and pharmacists who meet regularly during the year to review and update the formulary. Committee members base their decisions on drugs' safety, effectiveness, and cost.

CCHP prescription drugs are organized into four formulary tiers:

Tier 1 consists of generic medications, which have the lowest copayment. Generic drugs offer the same level of safety and quality as their brand-name equivalents. They have the same amount of active ingredients as brand-name medications. CCHP requires you to use a generic version of the drug if one is available. This means that if you receive a brand-name drug when a generic is available, you must pay the brand copayment in addition to the cost difference between the brand-name and generic forms of the drug.

Tier 2 consists of preferred-brand and generic medications. CCHP classifies these drugs as tier 2 based on clinical effectiveness and value.

Tier 3 consists of non-preferred medications (brand and generic).

Tier 4 consists of specialty medications (brand and generic), for which you will have the highest level of cost sharing. Specialty medications usually treat complex and rare conditions. These drugs are created because of advancements in drug development. These drugs can be high-cost medications and biologicals regardless of how they are administered (injectable, oral, transdermal or inhalant). Many specialty drugs require close management by a physician. Physicians need to monitor these drugs due to potential side effects and the need for frequent dosage adjustments.

For important information, such as cost-share and copayment details, please reference your Schedule of Benefits for your specific plan.

About generic drugs

Not all drugs have a generic equivalent. Generally, new drugs receive patent protection. Once the patent expires, other pharmaceutical companies can produce the same drug in a generic formulation. Companies that make generic drugs do not have to invest large amounts of money in research, since the company making the brand-name equivalent has already done this. Also, generic companies do not need to advertise their drugs. As a result, generic drug makers can pass these savings on to you.

Generic medications have the same active ingredients as brand-name drugs, but their inactive ingredients can vary. This is why the generic drug might look different from the brand-name drug. Inactive ingredients can be dyes used to color the drug or powders used to shape the tablets. Inactive ingredients do not affect how the generic drug works.

The FDA regulates generic drug manufacturers just as it regulates the makers of brand-name medications. The generic drug must pass strict FDA measurements to ensure that it delivers the same amount of the active ingredient in the same time frame as its brand-name counterpart. The manufacturer of the generic drug must prove that it produces its product under the same strict guidelines as the brand-name drug.

Formulary overview

The most commonly prescribed CCHP drugs are listed in the formulary section of this guide. Please note there are other drugs that CCHP covers in addition to the ones listed in this guide. Formulary changes are made frequently; for the latest information on the complete CCHP formulary and other pharmacy benefits, visit our website at chorushealthplans.org/our-plans/prescription-coverage.

You may also call our Customer Service at the number listed on your member ID card or on the first page of this guide. If you are a CCHP member, refer to your Schedule of Benefits for your applicable coinsurance or copayment amounts. If you did not receive a Schedule of Benefits, you may access it on your member portal or you can contact Customer Service. Your member ID card should also list your applicable coinsurance or copayment amounts.

Understanding this booklet

Prior Authorization (PA) – You will see the letters PA next to certain drugs in this booklet. PA stands for Prior Authorization. If a drug requires prior authorization, the CCHP Pharmacy Services Department must authorize the use of this drug before it will be covered.

Drugs that require prior authorization are often:

- Newer drugs for which CCHP wants to track usage
- Drugs not used as a standard first-line option in treating a medical condition
- Drugs with potential side effects that CCHP wants to monitor for patient safety
- Drugs categorized as specialty medications

Compounded medications that contain included ingredients require prior authorization.

Step Therapy (ST) – You will see the letters ST next to certain drugs in this booklet. ST stands for Step Therapy. Step therapy is the practice of using specific medications first when beginning drug therapy for a medical condition. The preferred first course of treatment may be generic medications or drugs that are considered as the standard first-line treatment. Preferred first courses of treatment are also standard clinical practice and based on clinical practice guidelines.

Step therapy is built into the electronic system that checks your medication history. A drug with step therapy will be automatically approved if there is a record that you have already tried the preferred first course of treatment. If there is no record that you tried the preferred drug(s) in your medication history, your physician must submit relevant clinical information to the CCHP Pharmacy Services Department before it will be covered.

Quantity Limits (QL) – You will see the letters QL next to certain drugs in this booklet. QL stands for Quantity Limits. Quantity limits are drug-specific and limit the amount of certain drugs that can be dispensed during a specified period of time. These limits are based on FDA guidelines, clinical literature and the manufacturer's instructions. Quantity limits promote appropriate use of the drug, prevent waste and help control costs. Your provider can request an exception to the quantity limit through the UPMC Health Plan Pharmacy Services Department.

Affordable Care Act (ACA) – You will see the letters ACA next to certain drugs in this booklet. ACA stands for Affordable Care Act. In accordance with the Patient Protection and Affordable Care Act of 2010 (PPACA), many select preventive medications are covered at no cost to you. There may be specific criteria that needs to be met in order for certain drugs to be covered at no additional charge to you.

Limited Availability (LA) – You will see the letters LA next to certain drugs in this booklet. LA stands for Limited Availability. Limited availability drugs must be obtained through our designated specialty pharmacy provider.

Therapeutic Interchange – The dispensing pharmacist filling your prescription may contact your provider for a verbal order of a therapeutic substitute for the medication they originally prescribed. The verbal order acts as a new active prescription. Therapeutic substitution of a medication may be different from generic substitution. A therapeutic substitute cannot be dispensed without a new prescription from your provider. A new prescription is not required to dispense a generic equivalent drug.

Getting your prescriptions filled

Retail

The CCHP network of retail pharmacies includes hundreds of locations — independent pharmacies as well as multistore chains — throughout the region. You can take your prescription to any pharmacy in the network. You must use 75 percent of your medication before you can get a refill. For specific pharmacy names, locations and telephone numbers, visit chorushealthplans.org/pharmacy or call our Customer Service Team at 1-844-201-4672.

Mail order

If you take maintenance medications for a chronic condition, you can get them through a mail-order pharmacy. Maintenance medications are generally taken on a regular, long-term basis. This may include drugs to treat high blood pressure, diabetes, asthma, high cholesterol and more.

With convenient mail-order service:

- You receive a 90-day supply of most drugs, plus refills, as prescribed by your doctor.
- You usually pay a lower out-of-pocket cost for a 90-day supply at a mail-order pharmacy than you would pay at a retail pharmacy.
- You get these drugs delivered right to your door.

Most mail-order prescriptions are written for a 90-day supply. If your doctor writes for a 30-day supply with two refills, the mail-order facility may combine the prescription to make a 90-day supply. If you do not want a 90-day supply, you should indicate this on the mail-order form. For a new medication, CCHP recommends that you try a 30-day supply of the drug from a retail pharmacy. That way your doctor has a chance to make sure that it is the right dose for you and that it does not cause any side effects. Once you are confident that the medication is appropriate, ask your doctor to write a prescription for a 90-day supply of each maintenance drug that you need (plus refills if appropriate). Then order the supply through the mail-order pharmacy.

To avoid running out of your mail-order prescription, reorder your medication while you still have an adequate supply remaining, allowing a few weeks for processing and delivery. To request refills, you may order online or over the telephone. You can request a mail-order form by calling Customer Service at 1-844-201-4672 or on our website at chorushealthplans.org.

Specialty pharmacy provider

Specialty medications that require special handling, provider coordination or patient education that cannot be provided by a retail pharmacy must be obtained through one of our designated specialty pharmacy providers. When you are prescribed a specialty medication and use a specialty pharmacy provider, you get mail-order delivery and improved access to drugs, as many retail pharmacies do not carry these types of medications.

CCHP highly recommends the use of a specialty pharmacy provider. Most specialty medications are required to be filled by a specialty pharmacy provider; however, certain specialty medications can be obtained from a retail pharmacy. You may be assessed an increased cost share for your specialty medication if you continue to obtain it from a retail pharmacy after the first fill.

Specialty pharmacy providers also improve care by providing education for our members and expanded access to health care professionals trained in the proper use of these specialty medications. A specialty pharmacy provider offers cost-effective health care and medication management and compliance programs.

Filling your prescription when traveling

When you travel outside of the CCHP service area, thousands of pharmacies across the country will honor your CCHP member ID card. To locate a participating pharmacy, contact our Customer Service team at the phone number listed on the back of your member ID card or on page 1 of this booklet.

To fill a prescription at a participating out-of-area pharmacy, present your CCHP member ID card. Some pharmacies may ask you to pay the full price of the medication. If that happens and your claim is approved, you will be reimbursed the amount that you paid for the medication, less your member responsibility. Please reference your Schedule of Benefits for specific copayment and coinsurance information.

You can request a "Pharmacy Direct Reimbursement Claim Form" by calling the Customer Service team or visiting the member materials online at **chorushealthplans.org**.

If you will be away from home for an extended period of time, or if you will be traveling outside of the country, you may want to use our mail-order service so that you receive a 90-day supply before you leave home.

Filling prescription eye drops

Your pharmacy benefits include coverage of prescription eye drops and refills of prescription eye drops, as long as the following criteria are met:

- You have used 75 percent of your medication at the time a refill is requested. This would include the number of days it would take to reach 75 percent usage based on the dosage of the medication.
- The prescription allows for a refill of the prescription eye drops.
- The requested refill does not exceed the number of refills allowed by the prescription.

Medication supplies not covered

- No authorizations will be provided for medications that are reported by the member, provider or pharmacy to be lost, misplaced, stolen, destroyed or damaged.
- Medications received at no charge to the member (workers' compensation, medications purchased with a manufacturer's coupon, etc.) will not be covered.
- Prescriptions that were written more than a year ago will not be covered. Your doctor will need to write a new prescription.

Medications not covered

The following medications are benefit exclusions and will not be covered under the pharmacy benefit:

- Antimalarial agents when used for prevention
- Antiobesity medications, including but not limited to, appetite suppressants and lipase inhibitors, and other medications being used for a primary indication of weight loss
- Compounded products containing excluded ingredients (examples are compounded hormone replacement therapies and compounded narcotic analgesics)
- Drugs labeled for investigational use

- Drugs used for cosmetic purposes
- Drugs used to treat sexual dysfunction (examples are Cialis, Levitra, Stendra, Viagra, Caverject, Muse, Intrarosa and Osphena)
- Fertility agents
- Legend vitamins (other than prenatal, fluoride and certain therapeutic vitamins)
- Most over-the-counter medications**
- Needles/syringes (other than insulin) *
- Nutrition and dietary supplements*
- Ostomy supplies*
- Therapeutic devices/appliances*
- Urine strips (Because our doctors believe blood glucose strips are more accurate than urine test strips in measuring blood glucose, urine strips are not a covered benefit.)

This is not a complete list and there may be other medications that are not covered. For more information, please contact Customer Service at the phone number on the back of your member ID card or on page 1 of this guide.

Please note that, under certain circumstances, your medical benefits may cover the items marked with an asterisk (). For information on these items, you can contact our Customer Service team at the number listed on the back of your member ID card. If you have not yet received an ID card, call our Customer Service number listed on page 1 of this booklet.

**Additional over-the-counter medications may be covered in accordance with the Patient Protection and Affordable Care Act. The Preventive Service Guide is available at chorushealthplans.org/preventive-guidelines.

Drug exceptions, time frames and enrollee responsibilities

If the medication you take is not on the list of covered drugs for your benefit plan (also called a “formulary”), you can request coverage through a non-formulary exception. A non-formulary exception will only be approved if there is documented evidence that the formulary alternatives are not effective in treating your condition; the formulary alternatives would cause adverse side effects; or a contraindication exists such that you cannot safely try the formulary medication.

Review the covered list of drugs listed in this document. Talk with your doctor about whether they are able to prescribe one of the drugs that is covered.

If you need to request a non-formulary exception, contact Customer Service or access the exception request form, which can be found with the member materials online at chorushealthplans.org. When you make this request, we may contact your prescriber or physician for information to support your request.

After CCHP receives your request, we will make our decision within 72 hours. You can request a faster (expedited) decision if you or your doctor believe that waiting up to 72 hours for a decision could seriously harm your health. If your request to expedite is granted, we must give you a decision no later than 24 hours after we received your request.

If we deny your request for a non-formulary exception, you may first request an internal review of that decision by contacting Customer Service. If the denial of the non-formulary exception request is upheld through an internal review, you may then request an external review by an Independent Review Organization (IRO). Requests for an external review can also be made by contacting Customer Service at 1-844-201-4672.

List of Abbreviations

1: Preferred Generic Medications

2: Preferred Brand Medications and Generic Medications (Brand and Generic)

3: Non-Preferred Medications (Brand and Generic)

4: Specialty Medications (Brand and Generic)

ACA: Affordable Care Act.

LA: Limited Availability. This prescription may be available only at certain pharmacies. For more information, please call Customer Service.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

SG: Select Generics.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
