

Pharmacy Benefit Guide 2020

Pharmacy Program Overview

The pharmacy program of Together with CCHP offers a variety of high-quality, effective generic and brand-name prescription drugs. This guide provides information that applies to most members. For information specific to your plan, please read your Schedule of Benefits.

When you need a prescription medication, you and your doctor can choose from six different levels, or “tiers.” Each tier has a different copayment. This gives you and your doctor the freedom to choose the medication that is right for you. At the same time, this will help you to better budget your health care dollars.

This guide provides an overview of your pharmacy benefit with Together with CCHP. It explains the copayment structure, the process for getting certain drugs covered, your options for filling prescriptions, important phone numbers, and more.

Contact numbers

Current Together with CCHP members

- Customer Service: 1-844-201-4672
- Pharmacy Services (for practitioners and pharmacies): 1-844-201-4677
- Hearing-impaired members: TTY: 7-1-1

Prospective Together with CCHP members

- Sales Team: 1-844-708-3837
- Online information is available at **togetherCCHP.org/pharmacy**

For the latest information on the Together with CCHP drug formulary and other pharmacy benefits, go to **togetherCCHP.org/pharmacy**. You may also call Customer Service at the number listed above or on the back of your member ID card.

Read your contract carefully to determine which health care services are covered.

For prospective members

If you are thinking about joining Together with CCHP and would like information about applicable coinsurance or copayment amounts, go to the Summary of Benefits and Coverage (SBC) on the Together with CCHP website at togetherCCHP.org or call the Sales Support team at 1-844-708-3837.

Understanding coverage and cost sharing

Our formulary is the list of Food and Drug Administration (FDA)-approved drugs that we cover. Our Pharmacy and Therapeutics (P&T) Committee researches and evaluates medications we may cover. Committee members include local doctors and pharmacists who meet regularly during the year to review and update the formulary. Committee members base their decisions on drugs' safety, effectiveness, and cost.

Together with CCHP prescription drugs are organized into six formulary tiers:

Tier 1 is for generic medications, which have the lowest copayment. Generic drugs offer the same level of safety and quality as their brand-name equivalents. They have the same amount of active ingredients as brand-name medications. Together with CCHP requires you to use a generic version of the drug if one is available. This means that if you receive a brand-name drug when a generic is available, you must pay the brand copayment in addition to the retail cost difference between the brand-name and generic forms of the drug.

Tier 2 is for preferred-brand medications. Together with CCHP classifies these drugs as “preferred” because of their value and effectiveness.

Tier 3 is for non-preferred medications (brand and generic).

Tier 4 is for specialty medications, for which you will have the highest level of cost sharing. Specialty medications usually treat complex and rare conditions. These drugs are created because of advancements in drug development. These drugs can be high-cost medications and biologicals regardless of how they are administered (injectable, oral, transdermal, or inhalant). Specialty drugs require close management by a physician. Physicians need to monitor these drugs due to potential side effects and the need for frequent dosage adjustments.

Tier 5 is for zero cost share preventive drugs. In accordance with the Patient Protection and Affordable Care Act of 2010 (PPACA), many preventive medications are covered at no cost to you.

Tier 6 is for select generic medications. Select generic medications are offered at no additional cost share to you. Many of these medications can help you avoid getting sick and may improve your overall health.

About generic drugs

Generic drugs have the same active ingredients as their brand-name equivalents, but cost significantly less. Not all drugs have a generic equivalent. Generally, new drugs receive patent protection. Once the patent expires, other pharmaceutical companies can produce the same drug in a generic formulation. Companies that make generic drugs do not have to invest large amounts of money in research, since the company making the brand-name equivalent has already done this. Also, generic companies do not need to advertise their drugs. As a result, generic drug makers can pass these savings on to you.

Generic medications have the same active ingredients as brand-name drugs, but their inactive ingredients can vary. This is why the generic drug might look different from the brand-name drug. Inactive ingredients can be

dyes used to color the drug or powders used to shape the tablets. Inactive ingredients do not affect how the generic drug works.

The FDA regulates generic drug manufacturers just as it regulates the makers of brand-name medications. The generic drug must pass strict FDA measurements to ensure that it delivers the same amount of the active ingredient in the same time frame as its brand-name counterpart. The manufacturer of the generic drug must prove that it produces its product under the same strict guidelines as the brand-name drug.

Formulary overview

The most commonly prescribed Together with CCHP drugs are listed in the formulary section of this guide. Please note there are other drugs that Together with CCHP covers in addition to the ones listed in this guide. For the latest information on the complete Together with CCHP formulary and other pharmacy benefits, visit our website at togetherCCHP.org/pharmacy. (Select “Together with CCHP” to access the searchable drug list.)

You may also call our Customer Service at the number listed on your member ID card or on the first page of this guide. If you are a Together with CCHP member, refer to your Schedule of Benefits for your applicable coinsurance or copayment amounts. If you did not receive a Schedule of Benefits, contact Customer Service at the number on your member ID card. Your member ID card should also list your applicable coinsurance or copayment amounts.

Understanding this booklet

Prior Authorization (PA) – You will see the symbol PA next to certain drugs on the formulary tables in this booklet. PA stands for Prior Authorization. If a drug requires prior authorization, the Together with CCHP Pharmacy Services Department must authorize the use of this drug before it will be covered.

Drugs that require prior authorization are often:

- Newer drugs for which Together with CCHP wants to track usage.
- Drugs not used as a standard first-line option in treating a medical condition.
- Drugs with potential side effects that Together with CCHP wants to monitor for patient safety.
- Drugs categorized as specialty medications.

Compounded medications that contain included ingredients require prior authorization.

Step Therapy (ST) – You will see the symbol ST next to certain drugs on the formulary tables in this booklet. ST stands for Step Therapy. Step therapy is the practice of using specific medications first when beginning drug therapy for a medical condition. The preferred first course of treatment may be generic medications or drugs that are considered as the standard first-line treatment.

Step therapy is built into the electronic system that checks your medication history. A drug with step therapy will be automatically approved if there is a record that you have already tried the preferred drug(s). If there is no record that you tried the preferred drug(s) in your medication history, your physician must submit relevant clinical information to the Together with CCHP Pharmacy Services Department before it will be covered.

Quantity Limits (QL) – You will see the symbol QL next to certain drugs on the formulary tables in this booklet. QL stands for Quantity Limits. Quantity limits are drug-specific and limit the amount of certain drugs that can be dispensed during a specified period of time. These limits are based on FDA guidelines, clinical literature, and the manufacturer’s instructions. Quantity limits promote appropriate use of the drug, prevent waste, and help control costs.

For some drugs, the dosing guidelines may recommend that patients take the drug one time a day in a larger dose instead of several times a day in smaller doses. The quantity limits follow the guidelines and cover one larger dose per day. Your physician can request an exception to the quantity limit through the Together with CCHP Pharmacy Services Department. Prescriptions for controlled substances and specialty medications are limited to a 30-day supply.

Affordable Care Act (ACA) – You will see the symbol ACA next to certain drugs on the formulary tables in this booklet. ACA stands for Affordable Care Act. In accordance with the Patient Protection and Affordable Care Act of 2010 (PPACA), many select preventive medications are covered at no cost to you.

Over the Counter (OTC) – You will see the symbol OTC next to certain drugs on the formulary tables in this booklet. OTC stands for Over the Counter. Even though over the counter drugs can typically be purchased without a prescription, a prescription is required for coverage of these medications on your pharmacy benefit.

Limited Availability (LA) – You will see the symbol LA next to certain drugs on the formulary tables in this booklet. LA stands for Limited Availability. Limited availability drugs must be obtained through our designated specialty pharmacy provider.

Getting your prescriptions filled

Retail

The Together with CCHP network of retail pharmacies includes hundreds of locations — independent pharmacies as well as multistore chains — throughout the region. You can take your prescription to any pharmacy in the network. You must use 75 percent of your medication before you can get a refill. For specific pharmacy names, locations, and telephone numbers, visit togetherCCHP.org/pharmacy or call our Customer Service Team at 1-844-201-4672.

Mail order

If you take maintenance medications for a chronic condition, you can get them through a mail-order pharmacy. Maintenance medications are generally taken on a regular, long-term basis. This may include drugs to treat high blood pressure, diabetes, asthma, high cholesterol, and more.

With convenient mail-order service:

- You receive a 90-day supply of most drugs, plus refills, as prescribed by your doctor.
- You usually pay a lower out-of-pocket cost for a 90-day supply at a mail-order pharmacy than you would pay at a retail pharmacy.
- You get these drugs delivered right to your door.

Most mail-order prescriptions are written for a 90-day supply. If your doctor writes for a 30-day supply with two refills, the mail order facility may combine the prescription to make a 90-day supply. If you do not want a 90-day supply, you should indicate this on the mail-order form. For a new medication, Together with CCHP recommends that you try a 30-day supply of the drug from a retail pharmacy. That way your doctor has a chance to make sure that it is the right dose for you and that it does not cause any side effects. Once you're confident that the medication is appropriate, ask your doctor to write a prescription for a 90-day supply of each maintenance drug that you need (plus refills if appropriate). Then order the supply through the mail-order pharmacy.

To avoid running out of your mail-order prescription, reorder your medication while you still have an adequate supply remaining, allowing a few weeks for processing and delivery. To request refills, you may order online or over the telephone. You can request a mail-order form by calling Customer Service at 1-844-201-4672 or

requesting the form here togethercchp.org/member-forms

Specialty pharmacy provider

Specialty medications that require special handling, provider coordination, or patient education that cannot be provided by a retail pharmacy must be obtained through our designated specialty pharmacy provider. When you are prescribed a specialty medication and use a specialty pharmacy provider, you get mail-order delivery and improved access to drugs, as many retail pharmacies do not carry these types of medications.

Together with CCHP highly recommends the use of a specialty pharmacy provider. Most specialty medications are required to be filled by a specialty pharmacy provider; however, certain specialty medications can be obtained from a retail pharmacy. You may be assessed an increased cost share for your specialty medication if you continue to obtain it from a retail pharmacy after the first fill.

Specialty pharmacy providers also improve care by providing education for our members and expanded access to health care professionals trained in the proper use of these specialty medications. A specialty pharmacy provider offers cost-effective health care and medication management and compliance programs.

Filling your prescription when traveling

When you travel outside of the Together with CCHP service area, thousands of pharmacies across the country will honor your Together with CCHP member ID card. To locate a participating pharmacy, contact our Customer Service team at the phone number listed on the back of your member ID card or on page 1 of this booklet.

To fill a prescription at a participating out-of-area pharmacy, present your Together with CCHP member ID card. Some pharmacies may ask you to pay the full price of the medication. If that happens and your claim is approved, you will be reimbursed the amount that you paid for the medication, less the appropriate copayment.

You can request a "Pharmacy Program Direct Reimbursement Claim Form" by calling the Customer Service team or requesting the form online at togethercchp.org/member-forms

If you will be away from home for an extended period of time, or if you will be traveling outside of the country, you may want to use our mail-order service so that you receive a 90-day supply before you leave home.

Medication supplies not covered

- No authorizations will be provided for medications that are reported by the member, provider, or pharmacy to be lost, misplaced, stolen, destroyed, or damaged.
- Medications received at no charge to the member (workers' compensation, medications purchased with a manufacturer's coupon, etc.) will not be covered.
- Prescriptions that were written more than a year ago will not be covered. Your doctor will need to write a new prescription.

Medications not covered

The following medications are benefit exclusions and will not be covered under the pharmacy benefit:

- Antimalarial agents when used for prevention
- Antiobesity medications, including, but not limited to, appetite suppressants and lipase inhibitors
- Blood or blood plasma products*
- Compounded products containing excluded ingredients (examples are compounded hormone replacement therapies and compounded narcotic analgesics)
- Drugs labeled for investigational use
- Drugs used for cosmetic purposes or hair growth
- Drugs used to treat sexual dysfunction (examples are Cialis, Levitra, Stendra, Viagra, Caverject, Muse,

- Intrarosa, and Osphena)
- Fertility agents
- Legend vitamins (other than prenatal, fluoride, and certain therapeutic vitamins)
- Most over the counter medications**
- Needles/syringes (other than insulin) *
- Nutrition and dietary supplements*
- Ostomy supplies*
- Therapeutic devices/appliances*
- Urine strips (Because our doctors believe blood glucose strips are more accurate than urine test strips in measuring blood glucose, urine strips are not a covered benefit.)

This is not a complete list and there may be other medications that are not covered. For more information, please contact Customer Service at the phone number on the back of your member ID card or on page 1 of this guide.

Please note that, under certain circumstances, your medical benefits may cover the items marked with an asterisk (). For information on these items, you can contact our Customer Service team at the number listed on the back of your member ID card. If you have not yet received an ID card, call our Customer Service number listed on page 1 of this booklet.

**Additional over the counter medications may be covered in accordance with the Patient Protection and Affordable Care Act. The Preventive Service Guide available at togetherCCHP.org/preventive-guidelines

Drug exceptions, time frames and enrollee responsibilities

If the medication you take is not on the list of covered drugs for your benefit plan (also called a “formulary”), you can ask us to cover it. This is called a “non-formulary exception.” A request for a non-formulary exception will only be approved if there is documented evidence that the formulary alternatives are not effective in treating your condition; the formulary alternatives would cause adverse side effects; or a contraindication exists such that you cannot safely try the formulary medication.

As a first step, you can contact Customer Service for a list of similar drugs that are covered by your plan or you can go to togetherCCHP.org/formulary for this information. When you have the list, show it to your doctor and see whether he or she is able to prescribe one of the drugs on this list.

If you need to request a non-formulary exception, contact Member Services or access the exception request form through your member portal CCHP Connect (togetherCCHP.org/CCHP-Connect). When you make this request, we may contact your prescriber or physician for information to support your request. After Together with CCHP receives your request, we will make our decision within 72 hours. You can request a faster (expedited) decision if you or your doctor believe that waiting up to 72 hours for a decision could seriously harm your health. If your request to expedite is granted, we must give you a decision no later than 24 hours after we received your request.

If we deny your request for a non-formulary exception, you may first request an internal review of that decision by contacting Customer Service. If the denial of the non-formulary exception request is upheld through an internal review, you may then request an external review by an Independent Review Organization (IRO). Requests for an external review can also be made by contacting Customer Service at 1-844-201-4672.

List of Abbreviations

ACA: Affordable Care Act.

LA: Limited Availability. This prescription may be available only at certain pharmacies. For more information, please call Customer Service.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
